DATA/STAT 334: Participation Rubric

The following is a rubric used to grade your blog posts.

Category	Excellent (5)	Good (3)	Poor (0)
Correctness	The visualization is appropriate for the question being asked.	The visualization is somewhat appropriate but another type of visualization would be better.	The visualization is not very appropriate for the question being asked.
Level of Question	The level of the question being asked is appropriate for this time of the course.	The question is a little too easy to answer for this time of the course.	The question is too easy to answer for this time of the course.
Presentability	The visualization, the code, and the write-up are all easy to read and understand and are aesthetically pleasing.	The visualization, code, and write-up are mostly easy to understand but there are minor issues and the post could be more professional.	The post is hard to follow because of issues in the visualization, code, or write-up.
Connection to Class Ideas	A written description connecting the visualization to class concepts is present and clear.	A written description is present but is somewhat lacking in the connection to class.	A written description is either absent or does not correctly apply visualization concepts to what was discussed in class.
Visualization Interpretation	Visualization is interpreted clearly and correctly	Visualization is interpreted somewhat clearly and correctly but there is a minor error or two.	There are major flaws in the visualization interpretation.
